1. It has been reported that the manufacture of tubes for periscopes is carried out in special shops of the Matyas Rakosi (formerly Manfred Weiss) Factory. The production of these tubes started in 1946, with a weekly production of one tube until July 1947. The production has been doubled, and till the end of 1949, it was two tubes a week. The capacity is a great deal larger, but the shops are not working at full production.
2. The optical parts of the periscopes are made at the Magyar Optikai Művek in accordance with the designs of Zeiss and Leitz.
3. The final assembling of the periscopes is done in the shops of the Magyar Optikai Művek.
